Association of Polish Cities

A strong and effective country-wide organisation of local governments bringing together cities with common goals.

The Association of Polish Cities is the oldest Polish organisation of local governments dating back to the times when Poland was regaining its independence in the inter-war period.

The Association counts today 332 cities in Poland.

We effectively support Polish cities in their efforts to develop socially and economically, and disseminate good practices in modern and innovative governance of communities of citizens. We work with a number of public and private entities to create the best possible conditions for cities enabling them to provide public services of the highest quality.

- We can influence legislation
- We offer expertise and substantive support
- We make experience exchange possible
- We support promotion and information activities
- We cooperate with international partners (CEMR, CLRAE, CoR). Nearly 30% of all international partnerships involving Polish local governments were established with the Association's help
- Our main project: „Strengthening capacity of medium and small cities in Poland for implementing effective development policies”

Local Government Analysis System (SAS) 1999-2019

In 1996, the Association of Polish Cities started work on building the **Local Government Analysis System**. The aim was to build a unique, universally available system, thanks to which cities could collect and, in effect, analyze data over the Internet, previously unavailable in any other systems and in public statistics. As a result of the work of ZMP and the active participation of member cities in our research, a tool was created that systematically until 1999 supports local government units in the management and development of public services.

Selected previous projects implemented for cities by the Association of Polish Cities

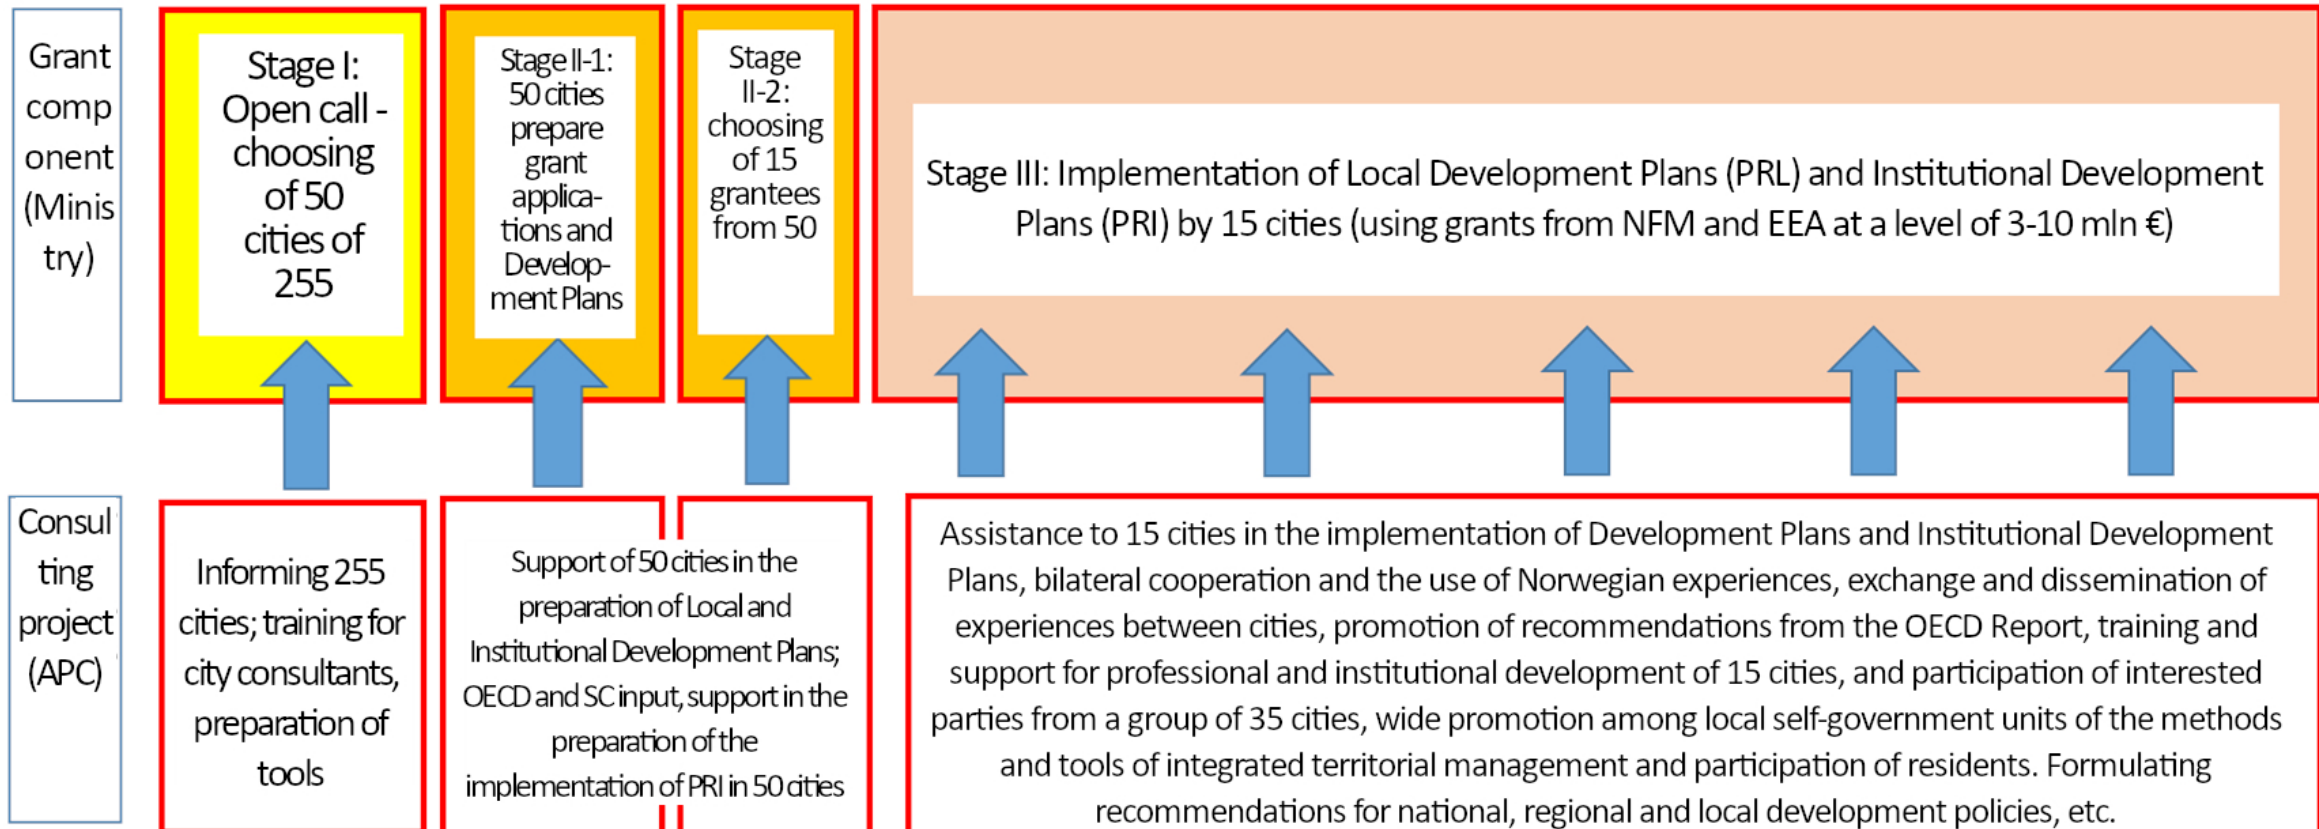

- Local Government Analysis System - the Union's flagship project, database and analysis results for cities (constant development since 1999)
- 2007-2011 - project "Building the institutional capacity of local government units for the effective delivery of public services" (MF EEA 2005-2008, priority 2.4) - EUR 3.1 million, in which about 600 local government units participated.
- 2009-2011 - System project of the Ministry of Labor and Social Policy concerning the development and dissemination of standards of cooperation between public administration and non-governmental organizations !!!!
- 2010-2012 "Improving public services and strategic management in 45 LGUs" - Human Capital Operational Programme 5.1 (25 cities + 10 rural municipalities + 10 counties) – Experience Exchange Group + strategic planning methodology

Selected previous projects implemented for cities by the Association of Polish Cities

- 2012-2016 The project "Building competences for inter-governmental and intersectoral cooperation as a tool for local and regional development", EUR 3 million, supported a total of 600 local government units from 62 partnerships preparing development programs in OF (NFM 2009-2013)
- 2016-2017 - APC two projects related to environmental protection in cities and promotion of the use of renewable energy sources in them - under the Bilateral Cooperation Fund NFM 2009-2013, grant competition for cities and bilateral cooperation
- 2016-2019 - POWER 2.18 Improving the management of local taxes and real estate - PLN 2.5 million for 8 cities - real estate management tools, tax policy
- Statistics Poland (national office) -APC working group (2012-2013) - introduction to PSMS
- Public Services Monitoring System (Stage 1, 2017-2019; Stage 2, 2019-2021) !!!!
- Local Development Monitoring (2018-2019) - LDM methodology and software

Forum of Local Development

Transformacja miast w kierunku Zielonego Ładu - zapraszamy na kolejne seminarium on-line

Budowa potencjału wewnętrznego miast poprzez zintegrowane zarządzanie środowiskiem, energią i odpadami będzie tematem kolejnego seminarium on-line w ramach Forum Rozwoju Lokalnego.

06.10.2020 Program „Rozwój lokalny”, FORUM ROZWOJU LOKALNEGO

PPP. Seminarium Forum Rozwoju Lokalnego – relacja i prezentacje

23 września Związek Miast Polskich zorganizował kolejne seminarium on-line poświęcone rozwojowi małych i średnich miast. Rozmawiano o partnerstwie publiczno-prywatnym.

23.09.2020 PPP, Program „Rozwój lokalny”, FORUM ROZWOJU LOKALNEGO

Partnerstwo publiczno-prywatne – zapraszamy na transmisję seminarium

Zapraszamy na transmisję dziewiątego już seminarium on-line Forum Rozwoju Lokalnego, poświęconego wewnętrznym potencjałom rozwoju małych i średnich miast w Polsce.

22.09.2020 Program „Rozwój lokalny”, FORUM ROZWOJU LOKALNEGO

Finanse miast - prezentacje i zapis wideo seminarium

Finanse miast – zapraszamy na transmisję z seminarium

PPP – zapraszamy na kolejne seminarium on-line

Open platform for local government-government-expert debate.

On-line seminars on diverse topics related to urban development.

RESOLVE: sustainable mobility and the transition to a low-carbon retailing economy

The RESOLVE project innovatively addresses two urgent challenges in European cities: the declining retail sector and the increasing need to reduce CO₂.

The overall objective is to reduce carbon emissions created by retail related traffic in town and city centres while also supporting jobs and growth in the local retail economy. We will improve regional policies through innovative new projects and by improving governance so that the different stakeholders can agree common solutions.

Tropa Verde

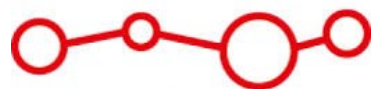

Tropa Verde is a Transfer network to encourage environmentally responsible behaviour that empowers citizens to reuse and recycle. Combining web platform and low cost campaigns, it is considered as a "civic movement fully committed to sustainability and circular economy". Citizens get vouchers and exchange them for rewards from the City Council and local retailers. It connects places where disposing waste (green points, civic and social centres, etc.) with local businesses providing gifts or discounts.
